

Just One More Part, LLC

Fabrication & Repair Capabilities

New LLC. Experienced hands. JOMP is built around practical fabrication experience and a network of skilled welders, fabricators, vendors, finishers, and installation partners.

Prior marine aluminum fabrication experience

Good-Fit Work

Brackets, plates, mounts, panels, railings, guards, shop fixtures, equipment repair parts, trailer-related parts, display/cabinet metalwork, and small-batch fabrication.

Materials / Processes

Steel, stainless, aluminum, tube, sheet, plate, welding, fitting, formed parts, vendor-supported cutting/bending, and finish coordination.

How To Start

Send photos, sketches, drawings, DXF files, STEP files, rough dimensions, material if known, quantity, deadline, and finish/install needs.

Service Area

Central and eastern Pennsylvania, including York, Lancaster, Harrisburg, Reading, Pottstown, Allentown, King of Prussia, Williamsport, State College, and north-central PA coordination.

Quote note: We review each request before quoting. High-risk, load-rated, DOT, engineered, certified, pressure, lifting, or safety-critical work may require engineering review, rating, specialty vendor support, or may be declined if outside scope.

Real Fabrication Examples

Photos shown include prior fabrication examples from experienced people in the JOMP network. These examples show practical capability in aluminum, stainless, tube work, marine components, railings, panels, brackets, and custom fabrication.

Tube and plate fabrication

Tube railing / framework fabrication

Marine / Aluminum / Stainless Examples

Marine and outdoor work shows fit-up, tube work, aluminum fabrication, storage components, railings, and finished assemblies.

Marine canopy frame with integrated rod holder work

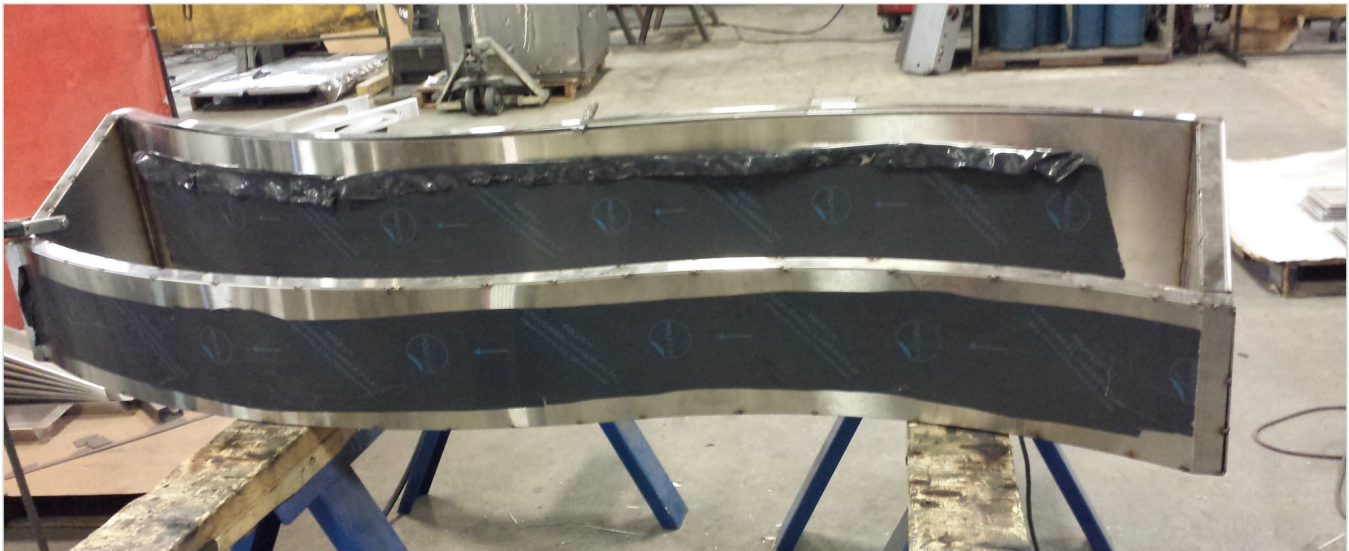

Aluminum boat storage boxes

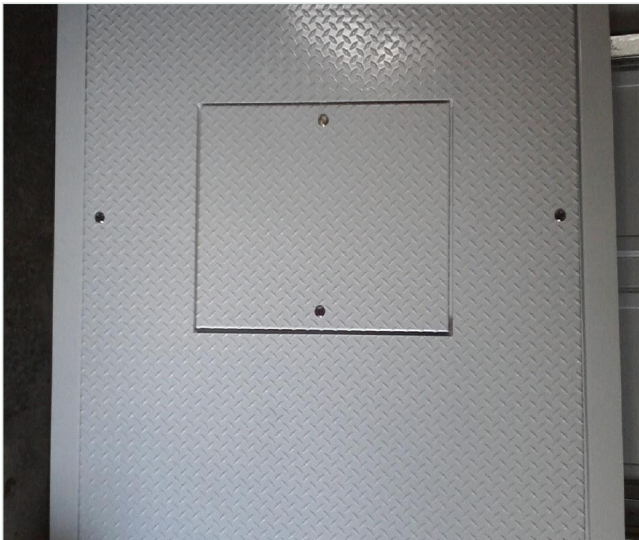

Rod holder tree / marine fabrication

Panels / Brackets / Oddball Work

The work is not always a perfect catalog part. These examples show custom panels, access covers, storage panels, sign/brand panels, formed parts, and repair-style metalwork.

Formed stainless / oddball panel fabrication

Diamond plate / access panel work

Custom storage / inlaid shelf panels

Ready to review: photos, field measurements, hand sketches, CAD drawings, DXF, STEP files, material specs, quantity, deadline, finish requirements, and install/support notes.
